Tech4Life Enterprises
Telemedicine & Point of Care technology for Health

Volume 1, Issue 5  November 2015

HIPAA compliant version of MDConsults launched at mHealth Summit 2015

Tech4Life Enterprises made an impactful participation at the mHealth Summit 2015, exhibiting its innovative HIPAA compliant Telemedicine solution ‘MDConsults’. The Summit is the largest event of its kind and a unique platform connecting diverse international delegations, comprising of government officials from the healthcare technology to policymakers, academic researchers and students, healthcare providers, entrepreneurs, investors, public health and safety officials and patient advocates from across mobile and connected health. The event took place on Nov 8-11, 2015 at the Gaylord National Resort and Convention Center, Washington, DC. This year’s conference also featured Global mHealth Forum, a gathering of influencers from over 50 countries to discuss the progression of mHealth in developing and emerging countries.

MDConsults is world’s fastest growing web and mobile telemedicine platform for practicing telemedicine. Its manifold features range from live to store–and-forward teleconsultation using DICOM compatible image management system for assistance in accurate diagnosis. MDConsults supports low cost and easy web based access for both small and large health facilities as well as community settings through web and mobile applications. Additionally the company also showcased its high quality plug-n-play digital stethoscope, ‘eSteth’ which is a highly dynamic and reliable diagnostic tool facilitating easy integration with any compatible telemedicine system.

Tech4Life also marked its presence at the mHealth Global Forum by presenting a poster titled ‘Health for Improving Mental Health for the Youth of Afghanistan’, highlighting the decrepit state of mental health prevailing in the young adults of the Badakhshan province of Afghanistan.

DKT and DoctHERs collaboration uses MDConsults as the Telemedicine solution

DoctHERs™ and DKT International have joined hands to improve Primary health care services in remote parts of Pakistan through Telemedicine. Tech4Life Enterprises shares similar vigor and passion when it comes down to helping low-economic groups of population. DoctHERs-DKT collaboration will work on supporting the existing Community Midwife (CMW) setups and providing the existing Dhanak Clinics with lady doctors through tele-consultation in real time. This arrangement not only allows doctor to assess the patients along with the midwife, but will also write down prescriptions which can be printed then and there only.

MDConsults will be used as telemedicine solution in the project which will connect the virtual doctor with the nurse and patient. The flexibility to change the language of the software interface makes MDConsults user friendly for CMWs. Furthermore, new groups have been formed for these clinics in the software. The facility to e-print the prescription is also upgraded in the software with the assistance from MDConsults support team DoctHERs and DKT will upgrade 5 Dhanak clinics into telemedicine centers within the first year of their contract. First such clinic will be deployed in December 2015.
Tech4Life’s Dissemination workshop for ‘Afganistan Mental Health Project’
an initiative for healing the Afghan youth

Tech4Life Enterprises proudly organized an informative dissemination workshop on its flagship mental health project ‘Improving Mental Health of Young Adults in Badakshan Province of Afghanistan using eHealth’ which was held on Tuesday, 24th November, 2015 at Serena Hotel Kabul, Afghanistan. This event had been jointly organized by the Ministry of Public Health (MOPH) Afghanistan, Aga Khan Health Services and Tech4Life Enterprises. Team Tech4Life shared the project interventions and associated impact with the media, health and IT experts and discussed the application of the innovation with key experts in the field to accelerate the development of ICT-based mental healthcare system in the region.

The workshop was attended by high level delegates from the Ministry of Public Health Afghanistan, NGOs and private health organizations, and local and international media.

The Afghanistan mental health project encompasses simple and cost effective eHealth and mHealth solutions to deal with mental health issues prevalent among the youth of this deprived region. The project integrates technological solutions with traditional approaches, considering cultural sensitivity towards reducing stigma and enhancing the youth’s economic and social potential within the community. The project also focuses on skills development of health providers by empowering them to provide quality mental health services through access to interactive protocols, MIS and telemedicine.

Tech4Life Enterprise expands its innovative Mobile telemedicine in India

With its vision of revolutionizing health care and creating global health impact through leveraging innovative technologies, Tech4Life Enterprises is pleased to sign official distributorship of its fastest growing mobile telemedicine solution ‘MDConsults’ in India with Health Corniche.

Health Corniche operates with business associates in the Healthcare domain across India. The company’s prime focus is on providing the best breed state of art technology-based solutions in the field of information technology along with delivering relevant and scalable solutions for healthcare providers. Both the companies will now work together towards improving access to health care by strengthening health systems and empowering health care providers.
